

Piyavate Hospital

Piyavate Hospital, open since 1993, offers modern facilities with high-tech medical equipment and a sophisticated computerized Medical Information System. They are staffed by a large pool of doctors and physicians that are certified by American Board and Thai Board, as well as experienced nurses and able medical technicians.

Piyavate Hospital is outstanding for the following specialty fields.

1. **Heart** - The Perfect Heart Institute offers full-service cardiology in Thailand with highly qualified doctors and the most advanced technology to give you the complete heart care in prevention, diagnosis, treatment, and cardiac rehabilitation.
2. **Cancer** - The Oncology & Gene Therapy Center is a cancer treatment center focusing on treatment of the cause of cancer, gene abnormalities. The genes in cancerous cells will be analyzed for abnormalities before physicians provide therapy with specific medicine to counteract such abnormal genes.
3. **Dental Care** - The Advanced Dental Institute, with sterilized equipment and American Board Certified dentists, offers a comprehensive range of specialties including dental care, braces & dental implants, cosmetic or pediatric dental work, root canal, treatment against dental caries and gum disease, oral and maxillofacial pedodontics, cosmetic dentists and oral surgery.
